

Complete Commercial sauna kits from Am-Finn Sauna & Steam

Am-Finn is committed to making your sauna kit purchase and construction easy. A quality sauna originates from the quality of materials and the sauna heater. Am-Finn has been the exclusive "preferred vendor" for the YMCA's nationally for 13 years. Am-Finn is also a preferred vendor for Gold's Gym, Powerhouse Gyms and Bally's Total Fitness. Am-Finn only supplies full-length clear Western Red Cedar. Each kit comes complete and cut to specifications with only the best commercial quality materials and components.

- Select boards of "Grade A and better" Tongue & Groove cedar, kiln-dried, "V" joint, for interior walls and ceiling.
- Full upper and lower benches made of Grade A clear cedar (screws to be fastened from the bottom)
- Removable Tru-Tile vinyl flooring or optional cedar duckboard for traffic areas.
- Standard insulated door with window (see Options list for additional door styles)
- 100% stainless steel sauna heater (240, 208 or 480 volts) with controls.
- Heater guardrail.
- Thermometer, wooden bucket, ladle, sauna light.
- Aluminum foil vapor barrier.

From Design to Installation - Am-Finn's Total Quality Commitment

Since 1962, Am-Finn Sauna and Steam has been guided by one simple principle - quality. Quality of advice, quality of products and quality of service. For over 45 years, many of the worlds finest institutions have trusted Am-Finn to deign, build and service their sauna and steam rooms. Architects, builders and facility managers trust Am-Finn's commitment to the time honored art of sauna and steam construction. Institutions such as Harvard, Yale and Michigan Universities and professional sports franchises such as the Washington Nationals, Dallas Cowboys and Washington Capitals rely on Am-Finn. From the beginning, Am-Finn has been the primary sauna and steam supplier to the US Government.

The Heart of The Sauna: Sauna enthusiasts know that pouring water on the sauna heater rocks will increase the sauna's humidity and temperature quickly. Club owners know that the Finnish tradition of pouring water on the sauna heater rocks cause damage to the heater and shorten the life of the elements. Am-Finn's **Ultra Sauna** heaters are the only heaters in the world that offer a solid pan design with **100% stainless steel** construction. The design allows the use of water while protecting the heater components. Unlike other heaters in the market, water does not run onto the elements and effect the electrical components. Also, Am-Finn heaters do not rust and require **less maintenance** than other heaters on the market.

Smart design also results in a more **energy-efficient** design. The Ultra sauna heater offers greater air-flow, therefore, heating the room more rapidly and extending the life of the elements. This is accomplished by a unique element chamber design that separates each heating element. By restricting air space, the lower cold mass of air forces the warm air out at a higher velocity. In traditional saunas, where the elements are grouped together in the chamber, the elements radiate heat against each other forcing the elements to work at a higher temperature and for longer periods of time compared to a convection design.
